- The Calendar is really helping. All the 6 people that was baptized had a Calendar and we think its good. The principles behind the calendar are helping the investigators know what we need to teach.
- We can get our district leaders to help their district use the baptismal calendar.
- The Calendar is good but we will get it as time goes on, probably in the next month.
- Some of our missionaries had people coming to church but these people weren't on date, so we helped them use the baptismal calendar and it helped those who is keeping commitments.

Effective and accurate planning:

- Missionaries need to know how to use the calendar and the exact time to use it.
- We could work effectively with our district leaders and take names of the people our missionaries are working with. We need to help our district leaders make sure

all their missionaries use the baptismal calendar to plan effectively for the people they teach.

- Next week our goals should be focused on those we are already working with in this month, then our planning will be realistic and meaningful.
- We will call and explained to our district leaders and sisters training leaders how to help our missionaries plan effectively, and we will even join some of their planning section.

Closing Remarks.

We need humility, prayers, and focus to be able to overcome temptation when we are tempted. Every missionary need to have their own conversion. We all need to be true and lifelong disciples
